

# Plant to the Sun

Community Plan 2025

*We are the energy that drives us*

What if we are not just a company?  
What if we can contribute to making things better?  
What if we propose, collaborate, and actively take part in the change?

## We want to make it a reality

---

Join us in our **PlantotheSun**

This program aims to be a guiding compass that helps us become part of the change. Our Corporate Purpose is rooted in our values: honesty, humility, perseverance, and hard work, while also striving to effectively contribute to the achievement of the Sustainable Development Goals (SDGs).

Our objective is to understand the realities of the local communities surrounding our projects and our team. We seek to support small changes that will improve the lives of people and the environment.

We are committed to working collaboratively, driving initiatives that empower local communities and encourage their active participation in building a sustainable future. We believe that every action, no matter how small, can create a positive and lasting impact, and we aim to be a catalyst for these transformations, adapting our strategies to the specific needs of each context.

## Environmental

We work every day to contribute to the global goal of reducing the carbon footprint.

## Community

We strive to be a growth engine for local communities through our projects.

## Education

We contribute to the training and knowledge of renewable energies to promote progress.

## Health

We lead numerous initiatives to promote healthy living and eating habits.

## Culture of lasting sustainability

With our deep respect for the environment surrounding both our projects and our offices, we work every day to contribute our part to the **global reduction of the carbon footprint**.

We have launched various initiatives that include reforestation of areas affected by wildfires, the creation of volunteer teams for cleaning natural spaces in collaboration with specialized organizations, and awareness and training programs. All these actions are **essential for fostering a culture of lasting sustainability**.

## We are the engine of cleaner energy

Far beyond our activity, we are a responsible company, and we are proud of the commitment of the Solar Steel team, which [seeks to be a growth engine for local communities](#). The projects we collaborate on go beyond mere delivery; we seek to advance alongside our clients and leave a positive footprint in every place our products reach.

We develop [various collaborations with local, regional, and national associations](#) to promote projects aimed at improving the living conditions of vulnerable groups. We are proud collaborators of CEE, which adds value to our daily operations and teaches us to be more inclusive and tolerant.

## A tool for changing the world

It is our duty to promote knowledge and training in renewable energies, guiding future professionals to understand our day-to-day operations and the various opportunities offered by the photovoltaic sector. Likewise, we want to bring these trainings closer to more remote environments where our projects are located, potentially providing professional development for the region.

In this context, we conduct talks at different educational forums, bringing our reality closer to the educational community. It is important for us to work on bringing these same actions to local communities, promoting specialized training and supporting initiatives that make the photovoltaic sector an attractive and future-oriented professional option for anyone seeking their path.

## Culture of comprehensive health

Care for health is one of the greatest concerns worldwide today. For years, through our *Healthy Life program*, we have supported various initiatives to **promote healthy living and eating habits**. We firmly believe that prevention is the key to a healthy future.

We promote training workshops on various topics and support multiple sports activities, as well as participation in charitable sports races throughout the national territory, where **we combine our commitment to health with social engagement**.
